

IIRSI 2016 CONFERENCE

Hotel ITC Grand CHOLA will go to witness the Intraocular Implant & Refractive Society, India (IIRSI) annual conference in Chennai. This conference will take place on 2nd & 3rd July 2016.

IIRSI 2016 is focusing on to get together all the Ophthalmologists of National and International level to discuss the advancement and betterment in technology and their experience in IOL implantation and Refractive Surgery. They will contribute the views towards the treatment of preventive blindness. This conference will play a vital role to the upcoming surgeon to gain the experience from the top notch of the professionals. They can abreast themselves with different way of tackling the tough situations of cataract and its surgery and interacting with leaders.

This conference will have academic feast of around 2500 delegates with National and International Faculty who will spread their experience and serve to the development in Ophthalmology. This platform will give a chance to participants to connect with the region's experts and share the vision and ideas to make the future techniques better.

IIRSI 2016 will provide opportunity to seek expert's views and opinions on advancements and new devices used in the treatments. This will help in training and education of new devices and methods of treatments. IIRSI has always received a support from Optical, Bio Medical and Pharmacy Industry.

Presence of **Eye specialist Doctors** in the conference will boost up the environment of the conference. And the views of **Best eye surgeons in world** will be there in the conference for the beginners to learn and gain the knowledge.

There are two main components of IIRSI 2016:

- In this two day conference live demonstrations of basic and advanced techniques in Ophthalmology.
- Half day special program, which is especially designed for beginners that will include practical tutorials by experts.

Live demonstration will include Phaco with Premium IOL's, C3R, Canaloplasty, Phakic IOLs, Femto Cataract, Glued IOL and more. This demonstration will be combined with state-of-the-art lectures. **IIRSI has a strong belief that this step will bring a new outcome and something better to the patients.**
