Registry Gear Has Been
Optimized And Enhanced
For Windows 7/8

Registry Gear is the next generation of [Windows registry cleaning and optimization tool](#). Using a state of the art scan engine it can give you a complete diagnosis of Windows registry, remove invalid registry entries, references and links, identify and thoroughly **repair the registry errors** and conflicts. Registry Gear can also **tweak and optimize** Windows registry to improve the performance of your Windows system, **speed up your computer** to navigate and operate smoothly.

Why Registry Gear?

The Windows registry is a directory which stores settings and options for the operating system for Microsoft Windows. It contains information and settings for all the hardware, operating system software, most non-operating system software, users, and preferences of the PC etc. Problems with the Windows registry are a common cause of Windows crashes and error messages. Without a regular maintenance, your system registry is no longer valid and gradually becomes fragmented and cluttered.

Safe
